DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 25, 28, and 30-35 in the reply filed on 4/24/06 is acknowledged. The traversal is on the ground(s) that the subject matter of all claims 1-37 is sufficiently related that a thorough search for the subject matter of any one group of claims would necessarily encompass a search for the subject matter of the remaining claims and that the search and examination of the entire application could be performed without serious burden. This is not found fully persuasive because a search of at least Invention II would not encompass a search for the subject matter of the other inventions and the examiner has demonstrated burden in the restriction requirement. However, the applicant's remarks regarding the relationships between Inventions VI and IX are persuasive. Claims 25-37 have been fully examined on the merits.

The requirement is still deemed proper and is therefore made FINAL.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The abstract of the disclosure is objected to because it does not provide a concise overview of the invention recited by the elected claims. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

Art Unit: 3651

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 25-28, 32, 36, and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshie et al. (US 6,354,059). Yoshie discloses a stack mechanism (30); a first alignment mechanism (51); a first conveying mechanism (52); a second alignment mechanism (53); a second conveying mechanism (62); a binding mechanism (50); and a folding mechanism (661).

Allowable Subject Matter

6. Claims 29-31 and 33-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
